

**Enduro  
Shield**

### TEN – YEAR WARRANTY

PCT Global LLC warrants that EnduroShield® will remain water repellent for a period of ten years from the date of the receipt provided by your dealer.

Conditions:

EnduroShield® must be professionally applied to new glass and prior to the glass coming into contact with any contaminants. EnduroShield® must be applied and maintained as per manufacturer’s instructions to validate and maintain the warranty.

If, within the warranty period, you feel that your glass is no longer easy to clean, please send an email to [serviceusa@enduroshield.com](mailto:serviceusa@enduroshield.com) and provide a brief explanation of the problem along with your name, address, telephone number and date of application. If it is determined that an area that has been treated has not remained water repellent, PCT Global LLC, will gladly provide replacement EnduroShield® for Glass in an amount determined to be adequate to re-coat the area that deems to be unprotected.

PCT Global LLC reserves the right to inspect the glass in order to determine that the product has been applied and maintained in a manner consistent with the manufacturers’ instructions.

## **CARE INSTRUCTIONS**

Congratulations, the cleaning and maintaining of your shower has become much easier.

- The glass needs to be cleaned every few weeks using a damp microfiber cloth and a mild detergent or soap to remove soap scum and grime from the glass.
- If you prefer, a general glass cleaner and a cloth are also suitable.
- The need to use harsh cleansers or toxic chemicals is no longer necessary to maintain the pristine appearance of your glass.
- When cleaning your treated glass be careful not to use any rough, gritty, highly acidic or abrasive cleaners that may remove the surface of the glass and damage the coating, therefore voiding the warranty.
- For areas with hard water or bore water, due to a higher concentrate of mineral deposits such as lime and calcium, a build up may occur on the protective coating and not be easily removed with a mild detergent. A solution of white vinegar and water (1 part vinegar to 5 parts water), will need to be used occasionally to dissolve these deposits. Please visit [www.enduroshield.com](http://www.enduroshield.com) for a list of frequently asked questions.
